THE U.S. ARMY INSIDER THREAT OPERATIONS HUB IS THE OPERATIONAL ELEMENT OF THE COUNTER-INSIDER THREAT PROGRAM.

IT IS DESIGNED TO DETECT CONCERNING BEHAVIORS FROM ARMY PERSONNEL AND TO DETER, PREVENT, AND MITIGATE THREATS TO ARMY PERSONNEL, RESOURCES, AND INFORMATION.

The Hub utilizes Artificial Intelligence, Machine Learning, and other computer aided tools to identify behavioral patterns that may indicate an individual poses a risk to the Army.

The Hub further coordinates with "spoke" elements, including law enforcement, counter-intelligence, and security to ensure synchronized detection and response. We are proud to be the Army's first-line in detecting threats from within.

Analysts compile information and consult with subject matter experts to assess risk and develop mitigation strategies.

FOR QUESTIONS OR FOR MORE INFORMATION ABOUT THE HUB, OR IF YOU NEED TO REPORT CONCERNING BEHAVIOR, PLEASE CONTACT:
